

KANISK G R

Cybersecurity Analyst

+91 8300855038 | kaniskraj787@gmail.com | [linkedin.com/in/kaniskraj](https://www.linkedin.com/in/kaniskraj) | github.com/KaniskRaj

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience securing enterprise and government network environments through Zero Trust Network Access (ZTNA), next-generation firewall administration, SIEM monitoring, and identity & access management. Background spans defensive operations (FortiGate/FortiAnalyzer, SOC monitoring, vulnerability remediation) and offensive security (penetration testing with Kali Linux, Metasploit, Burp Suite, Nmap) — a practical, attacker-aware view of enterprise risk. Delivered a 300+ user Zero Trust deployment with zero production incidents and achieved 100% CVE remediation across 100+ endpoints within SLA. Seeking to bring this network security, IAM, and risk-reduction experience to protecting Visa's global payment infrastructure as a Cybersecurity Analyst.

TECHNICAL SKILLS

- **Penetration Testing & Vulnerability Mgmt:** Kali Linux, Metasploit, Burp Suite, Nmap, Wireshark, Ivanti Patch Management, CVE Remediation, OWASP
- **Security Operations & SIEM:** FortiAnalyzer, SIEM Log Analysis, Event Correlation, Incident Detection & Response, SOC Operations, MITRE ATT&CK
- **Network & Perimeter Security:** FortiGate NGFW, Zero Trust / ZTNA, SSL/IPSec VPN, VLAN Segmentation, Cisco Catalyst Switches, Cisco ISR/ASR Routers
- **Identity & Access Management:** FortiAuthenticator, MFA, Azure Entra ID (Azure AD), SAML/LDAP SSO, Directory Sync
- **Platforms & Tools:** Windows Server, Ubuntu Linux, VMware, VirtualBox, Python (scripting)
- **Frameworks & Standards:** NIST CSF, NIST SP 800-53, ISO 27001, MITRE ATT&CK, OWASP, CIS Benchmarks, ITSM

PROFESSIONAL EXPERIENCE

Junior Penetration Tester

Sep 2025 – Present

Data Scouts and Guards Technology | India

- **Network & Perimeter Defence:** Administer FortiGate NGFW security policies, VIPs, NAT rules, and ZTNA access controls across enterprise network segments, enforcing least-privilege access for all users.
- **Identity & Access:** Partner with project stakeholders to deploy ZTNA and MFA solutions using FortiClient EMS and FortiAuthenticator, strengthening identity security and access governance.
- **Monitoring & Detection:** Conduct security monitoring, event correlation, and incident analysis through FortiAnalyzer SIEM while implementing network segmentation and routing optimization — improving threat visibility and reducing attack surface.

Security Intern

Jan 2025 – Mar 2025

Data Scouts and Guards Technology | India

- **Vulnerability Management:** Deployed Ivanti Patch Management across 100+ Windows and Linux endpoints, achieving 100% CVE remediation within defined SLA timelines.
- **System Hardening:** Hardened Windows and Linux servers by applying CIS security baselines and NIST SP 800-53 controls, measurably reducing attack surface.

KEY PROJECTS

ZTNA Implementation with MFA — UAE Government Organisation

- Supported design and implementation of a Zero Trust cybersecurity architecture for 300+ users using FortiClient EMS, Azure Entra ID, and FortiAuthenticator; contributed to security validation and post-implementation support, resulting in zero production incidents after go-live.

FortiAuthenticator + FortiGate SAML/LDAP SSO Integration Lab (Personal Project — GitHub)

- Designed and documented an end-to-end identity lab integrating FortiAuthenticator (SAML IdP + LDAP) with FortiGate (SAML SP) for centralized admin SSO — published as a step-by-step technical write-up with topology diagrams and configuration screenshots.

Centralised SIEM & Log Analysis — FortiAnalyzer Deployment

- Deployed FortiAnalyzer to centralize logs from FortiGate firewalls and FortiClient EMS; configured dashboards, correlation rules, and automated reports for proactive threat detection.

Enterprise Datacentre Security & Infrastructure Deployment — MORO Datacenter, Dubai, UAE

- Participated in deployment and validation of enterprise datacentre infrastructure (Cisco Nexus, Mellanox); supported production readiness and post-deployment security validation.

CERTIFICATIONS

- CompTia Security+ — In Progress
- Certified Cisco Network Administrator (Cisco) — In Progress
- Fortinet Certified Associate – Cybersecurity
- NSE 3 – Network Security Associate, FortiGate 7.6 Operator
- Harmony Endpoint & Harmony Browse Technical Specialist (Check Point)
- Google Cybersecurity Certificate (Coursera)

EDUCATION

Bachelor of Engineering (B.E.) – Electronics & Communication

Nov 2021 – May 2025

Velalar College of Engineering and Technology | Erode, Tamil Nadu, India
